

Hi Moorthy,

Date: 13 May, 2024

I am Farhad, the Project Manager at Creativeitem.

I am listing the quote price below:

SI	Description	Cost	Required Time
1.	Open ended question	\$500	1 week
2.	Download button with sorting terms functionality	\$300	3 Days
3.	Bulk upload of the student(CSV)	\$250	1 Week
4.	Printing answer script	\$100	3 Days
Total		\$1150	3 weeks

For your customization, the cost will be USD 1150, split into two milestones (\$650 initial + \$500 final).

The estimated completion time for the customization is 3 weeks.

Best regards,  
S M Farhad.  
Project Manager  
Creativeitem.

**Terms and conditions:**

\*The customization cost is split into two parts. When you pay the 1st milestone, we begin the project. Once it's done, we showcase it on the demo server. After the 2nd milestone payment, we deliver the customization files to you.

\*Payment of the full amount or final milestone is required before the delivery of the customization.

\*Upon the delivery of the customization, you will receive a complimentary 14-day support period for any assistance or queries related to the customized features.

\* For API-based integrations, you need to provide us with APIs, secret keys, etc. We will not use test keys coz in most of the cases test keys are not always fully functional. As a result, we have to encounter unnecessary delays.

\*During the ongoing customization project, no new features or requirements can be added. Any additional features can be considered after concluding the current contract, and new quotations will be provided for any new changes.

\*After customization, updating the version of our Codecanyon product is not the responsibility of Creativeitem.

\* When updating our Codecanyon Product to a newer version, there is a possibility that customization files may be overwritten or erased. It is advised to always back up your customization files before proceeding with the update.

\* If you go ahead with an update, keep in mind that you'll lose your customizations each time. Unfortunately, we don't assist with updating customizations with new updates.
