Project Requirements

6 Objectives

Admin Requirements

Requirement	User Story	Importance	Jira Issue	Notes
Category Management	i.e. Software Architecture Courses	HIGH		
Board Management	i.e. iSAQB			
Module Management	i.e. iSAQB CPSA-F			
Event Management				
Admin Permissions System	Blog Writer, Training Manager, etc.			
Provider Management	I want to manage all our providers. Add, edit, suspend, delete.			
User Management	Managing all users on the website. Add, edit, suspend, delete, assign course, etc. Just like tectrain, but better.			
Certification Management	Just like tectrain. Create, delete, manage.			
Discount Code Management	Just like tectrain, but more detailed and better.			
In-site provider & course advertisements	Like Hepsiburada & Trendyol. Providers should be able to pay to sponsor their courses/provider pages. We should be able manage them all.			
Blog	Detailed, wordpress-like blogging system. Maybe Wordpress integrated?			
SEO Management	Like tectrain's SEO management, but better, in one place.			
Logs	Log reports of admin & provider actions.			
Auto E-Mail Sending	Just like tectrain, but with			

	better manageability.		
Reports	Just like tectrain, but better, more detailed.		
Dashboard	All business-related data in one place. How many providers, how many courses, users, certifications, sales statistics.		

Provider Requirements

Requirement	User Story	Importance	Jira Issue	Notes
Subscribing to a plan		HIGH		
Module Management	Create a new module. Must be approved by an admin before going live!			
Event Management	Create, edit, delete events.			
Advertisement & Sponsored Content Management	This is a non-priority feature for later. Providers will be able to sponsor their events/modules just like hepsiburada & trendyol.			
Highly Detailed Dashboard for Statistics	How many events, how many sold, how many participants? etc.			
Trainer Management	Trainers will not have a specific trainer-page. This is a basic info.			
Discount Management	Providers will be able to create discounts, earlybird etc.			
Provider Page Management	Provider info, images, logo, etc.			

User Requirements

Requirement	User Story	Importance	Jira Issue	Notes

Create Account		HIGH	
Buy Courses			
Manage Documents			
Manage Courses			
Manage Certificates	Certificate Showroom, like tectrain, but with only certificate of participation.		
Manage Profile Info			

Website & System Requirements

Requirement	User Story	Importance	Jira Issue	Notes
Cloudflare		HIGH		
2-Factor-Auth	Admins and Providers must use two-factor-auth, for users it's optional.			
Tidio/Intercom Live-Chat				
Responsive Design	We must be prepared to get 70% of our users from mobile devices. Admin panel is not important, but provider and user interfaces are crucial.			
Stripe Payment Gateway	 Users will buy courses. Providers will subscribe. Payment Separation (see below) S Create a charge 			
Zapier Integration	Providers must be able to use Zapier as they wish. We will create a highly detailed Zapier API.			
Fast loading, optimized website.				
Auto-compressing for added images.				
Added image & documents must have a separate library for users, providers and admins.
