Introduction

What is Academy LMS -

Academy LMS is an online course-based learning management system. This web application is designed for creating courses, selling courses to students, and managing web portals.

Academy LMS is an online platform where the site admin and course instructors can create courses and make revenue by selling them to the students. On the other side, students can enrich their knowledge by purchasing courses from your application. In this course-based online educational platform. The course instructors can add videos, text, images, and documents as course materials.

What Academy LMS does

Academy is an online course-based educational platform. With Academy LMS, you can:

- Create and manage courses and quizzes
- Manage users
- Manage course revenue and course instructor's payouts
- Messaging With users
- Manage blogs
- Manage newsletter
- Add or manage themes and addons
- Configure settings

Who is Academy LMS for

Academy LMS is the best solution for any course-based online educational platform. Academy LMS can fit with any educational institute like school, college, university, training institute, yoga, cooking, painting, you just name it. Academy LMS is beneficial for:

- **Students:** The student or newly recruited employee who wants to enrich their knowledge and skills.
- **Instructors:** Who wants to crate and sell the course in their expertise subjects.
- **Admin:** The authority who operates the application creates and earns revenue, manages the user's panel, etc.

Basic terms -

What is a course

In Academy LMS, students and instructors can share and enrich their knowledge through a course-based system.

The instructor or course creator has to create lessons, quizzes, and add attachments under the course. Later, the course creator can update, modify, or remove the course. On the other side, students have to purchase the course to enroll in a course. In this learning platform, the course is a medium to connect the users to work together. Multiple instructors can create a course here.

Who is an admin

An admin is a user who has the highest number of privileges, permissions, and responsibilities in Academy LMS. The admin has to manage the entire system to operate the application.
In this platform, an admin can:

- Create users.
- Manage course and category.
- Manage revenue report menu.
- Grant permission to withdraw the instructor's revenue.
- Add addons.
- Configure and update the entire system settings.
- Accept/reject the application for the instructor.

Who is an instructor

The instructor is a user in the Academy LMS, who creates and sells courses in their expertise subjects.

An instructor can add, remove, and update the lessons, quizzes, and attachments. They can also overview sales and payout settings. An instructor can earn income by sharing a percentage of the course price after selling the course on this platform. Also, an instructor can continue messaging, and discussing lessons with admin and enrolled students.

Who is a student

In Academy LMS, students are the users who want to learn or upgrade skills in their favorite subjects.

?On this platform, students can purchase or subscribe to a course for enrollment. They can start or continue their enrolled course from the last preview. They can also browse courses and make wishlists. In Academy, a student can apply to become an instructor.

What is Drip content

The method of releasing your contents step by step is called drip content. You can lock new lessons in a course through the drip content feature. Your students have to see a particular percentage/time of previous lessons to unlock new ones if you activate drip content in a course. They can not see new lessons without watching the previous video. Also, your student's course learning progress will be updated automatically after unlocking a new lesson. The course creator can enable/disable this feature any time they want.
